

# Aspire Consulting

---

Getting Started with  
Oracle Cloud AI and AI  
Agent Studio

## Presenter Bio – Charlie Stegeman

---

**Position:** Partner

**Years of Experience:** 24+ years

### Software Experiences:

- PeopleSoft 24+ years
- Oracle Fusion: 5+ years and certified with Fusion HCM

## Presenter Bio – Randy Stone

---

**Position:** Manager

**Years of Experience:** 20+ years

### Software Experiences:

- PeopleSoft 20+ years
- Oracle Fusion: 4+ years and certified with Fusion HCM

# About Aspire Consulting

**2006**

Year Aspire was incorporated

**120+**

Consultants supporting our clients' initiatives

All resources are US based

**26.8**

Average years of experience for our consultants

**3.88**

GPA rating out of 4.0. Based on client feedback

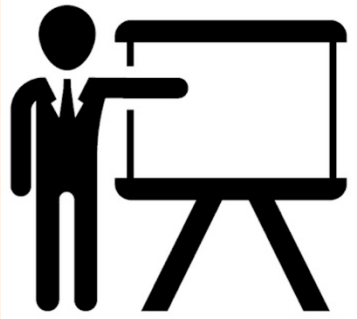

**1,300+**

Projects completed since our inception

# Agenda

---

1

**AI Assistant**

2

**AI Agent**

3

**Q&A**

## AI Assistants Defined

---

“

**Embedded AI-powered tools** designed to help users complete tasks by generating content, providing recommendations, and summarizing complex data.

# AI Assistant Key Features

---

01

**Content Generation:** Drafts text such as job descriptions, employee "About Me" profiles, and email responses to candidate inquiries

02

**Summarization:** Creates concise overviews of long documents, such as service request (SR) problem descriptions, meeting agendas from emails, and performance review notes

# AI Assistant Key Features

---

03

**Actionable Guidance:** Provides "next-step" recommendations for resolving complex cases or managing project milestones based on real-time data.

04

**Conversational Support:** Acts as an intelligent companion that can answer policy questions (e.g., benefits or expense policies) using a company's specific knowledge base

## AI Delivered By Pillar

Well over **500** AI tools delivered and embedded across pillars

Pillar	Agent	Generative	Predictive
HCM	89	72	27
ERP	14	10	6
SCM	101	45	19
EPM	1	25	34
CX	58	73	3

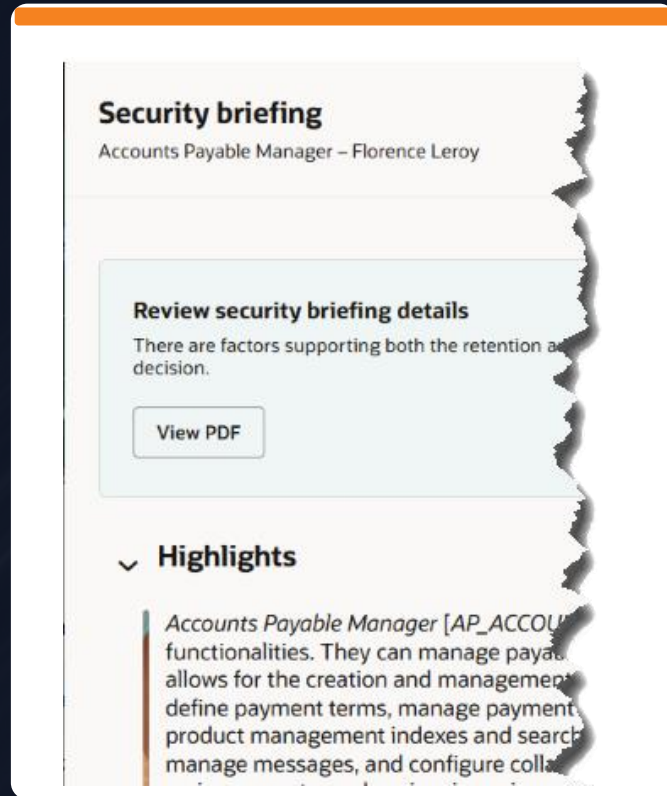

**Content Generation** a user entering limited information or text, selecting the AI Assistant button, and receiving full descriptive text back relevant to the text they entered.

Discuss user abilities such as review and edit the before saving.

Show how to configure

# DEMO: ERP

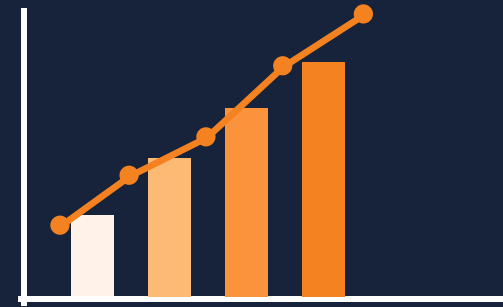

**Generative AI** summarizing complex system data, like security role and permissions making it easier for users to understand and respond or take action.

Show how to configure

**Predictive AI** analyzing historical data to provide guidance to a user without the need for the user to analyze reports outside of the business flow

## [Main Page](#)

Primary landing page in Oracle Docs related to their AI tools

02

## [AI by Pillar](#)

Can see which AI tools are available by pillar and product and access details on the feature and how to enable

03

## [Download AI List](#)

Download full list including which update and pillar and product

# AI Assistant Wrap Up

---

WRAP

500+

AI Assistants  
delivered within  
Fusion

AI

**Embedded** in the  
application, no third  
party connection or  
service required

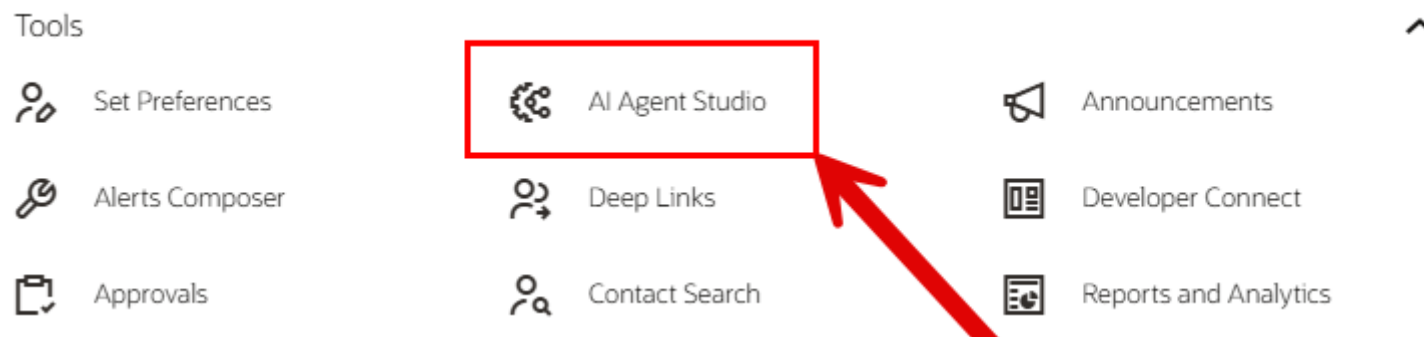

**Enabling the features is often very straightforward** and requires little more than setting an option, running a job or setting the parameter in Visual Builder

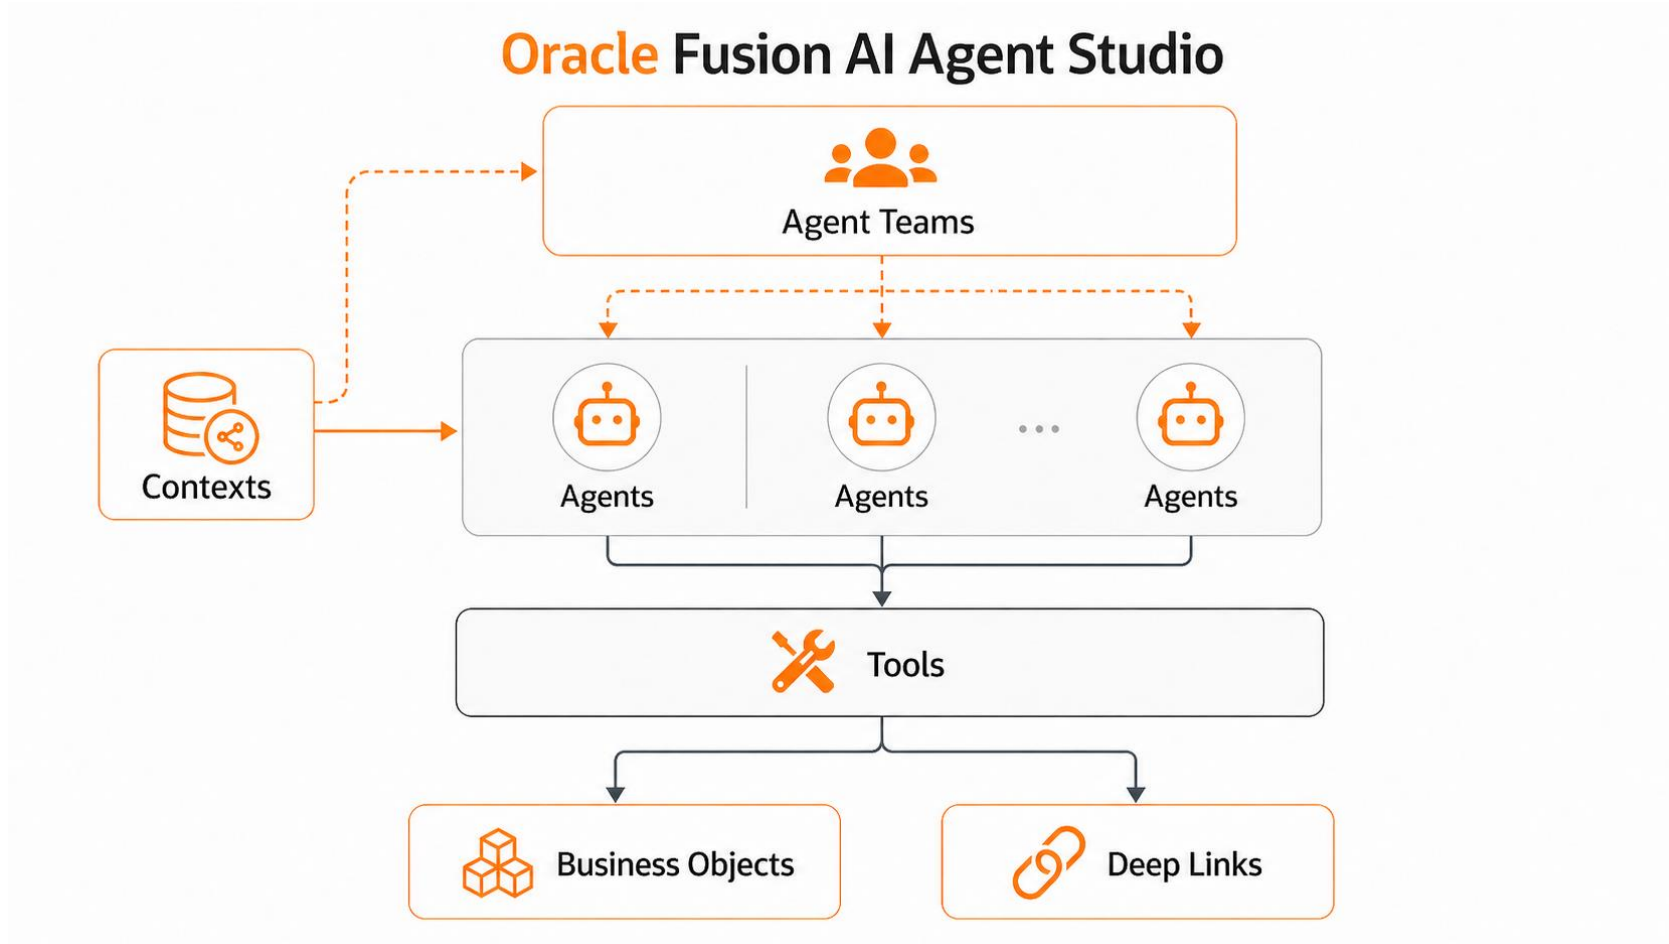

# AI Agent Studio

---

- Oracle's framework to build, configure, and deploy AI-driven automation inside Fusion
- Enables agents to **retrieve data, take action, and orchestrate workflows**
- Built for functional users and developers (low-code + extensibility)
- **Agent template libraries**
- **Agent team orchestration**
- **Agent extensibility**
- **Choice of LLMs**
- **Native Fusion integration**
- **Third-party system integration**
- **Trust and security framework**
- **Validation and testing tools**

# AI Agent Studio - Components

# DEMO

---

**Scenario:** Create an AI Agent to retrieve information about a worker and update the workers birthdate or birth country.

## Components:

- 1 Agent Team
- 1 Agent
- 3 Tools
- 1 Business Object
- 1 Deep Link
